***Payments From External Accounts:** When making a loan payment from an external account, there is an additional validation step (each time you make a payment). Follow the on-screen prompts to approve the transaction in the **Activity Center**.

Want to Add an External Account? To add a non-CNB account to the “from” account options, you must first add the account through the **Manage External Accounts** menu item. Once the account is added and you verify the micro-deposits, the account will appear in the “from” account options. Allow 1-2 business days to complete this process.
